

## Vacancy

### **Authorized Aircraft Maintenance Technicians Location Curacao.**

### **AAMT Certifying Staff B1 and or B2 Fokker 70/100, ATR42/72, Dash8/Q400, EMB145, A320/319 and B737**

Airline Technical Support Caribe BV (ATS Caribe) is about to run an Approved Maintenance Organization (AMO) in Curaçao, Dutch Antilles, operating an aircraft maintenance, repair and overhaul organization (MRO) with the primary focus on operators of Fokker 70/100 operators as well as on operators of narrow-body aircraft (ATR42/72, Dash8/Q400, EMB145, Boeing 737NG/MAX and Airbus A319/A320/A320NEO and similar) in the Caribbean region and in South & Central America.

We are currently seeking Authorized Aircraft Maintenance Technicians

The AAMT performs (mechanical and avionic) maintenance activities on (components of) aircraft and supervises maintenance work conducted by the Aircraft Mechanics (Non-Licensed).

The AAMT reports to the Maintenance Manager regarding the progress and quality of the activities as well as the supervision activities.

Qualifications needed for the job:

- Education: MBO or HBO technical education (MTS) or equivalent;
- EASA Aircraft Maintenance License (preferred) or any ICAO equivalent;
- Aircraft type rating and at least having worked on specified aircraft during the last six months
- Technical knowledge of relevant aircraft type(s);
- 160 hours course mandatory followed per aircraft type during 2020
- Thorough knowledge of procedures, manuals, regulations, instructions and CCAA, FAA & EASA rules & regulations accurate;
- Supervisory skills;
- Excellent written and oral skills in the English & Dutch language;
- Customer-focused (internal and external customers);
- Professionalism & quality of work;
- We're searching for team players with the right mindset and attitude, physically able to do the job.
