# SENIOR PROGRAMMER/ANALYST

## DIGITAL TRANSFORMATION OFFICE
## MADURO & CURIEL'S BANK

The Digital Transformation Office (Section: Host Applications) is seeking a highly skilled and results-driven **Senior Programmer/Analyst.** The incumbent is accountable for the effective and efficient development and control of assigned application systems and the review of project deliverables for quality assurance. The role involves providing expertise in developing detailed user requirements, deploying interfaces to integrate applications into the MCB environment, and participating in the installation of systems into the production environment.

## CANDIDATE PROFILE:

- **Education:** MBO level 4 or higher in Computer Science.
- **Experience:** A minimum of 5 years as a Programmer/Analyst.
- **Technical Expertise:** Proficient in RPG, RPG/ILE, CLP, and CLLE within an AS400 & I-series environment.
- **Specialized Knowledge:** Proven experience with ISO-8583 and card payment processing systems.
- **SDLC Mastery:** Well-versed in all stages of the application development lifecycle.
- **Soft Skills:** Strong analytical abilities and excellent communication skills in English, Dutch, and Papiamentu.
- **Performance:** Ability to troubleshoot under pressure and manage multiple tasks to meet strict deadlines.

**MCB**
