

Vacancy

Are you the dynamic, energetic and innovative professional that we need to reinforce our Support & Services division? CORE N.V. is further expanding its Support & Services team to better suit the needs of its various clients. We work hard to provide our customers the peace of mind to focus on their core business. Therefore we are looking for enthusiastic professionals for the following position:

Senior Systems Engineer

Job description

The Senior Systems Engineer is directly responsible for the installation, support and management of the technology infrastructure by proactively administering and optimizing servers, computer hardware/software, applications, data storage, data archiving, backup/recovery, disaster recovery, and network and security solutions.

Profile

The candidate possess several of the following qualifications:

- Bachelor's degree in Computer Science or similar
- MCSE certified (at least 70740 and 70741)
- VMWARE certified (6.5 or higher)
- Working knowledge of Lotus Notes/Domino is an advantage
- Working knowledge of Citrix server systems / Remote desktop Services
- Working knowledge of MS Office Suites, Endpoint detection and response technologies and database structures
- System and data security skills
- Minimum of 5 years of related technical experience
- Knowledge of MS Windows 2016/2019 server and Windows 10
- Knowledge of Linux operating systems is an advantage
- Knowledge of Cloud technologies e.g. BaaS, PaaS and DaaS concepts
- Knowledge of ITIL and Veeam
- Good networking/routing/VLAN's skills.
- Knowledge of Fortinet Networks is an advantage
- Strong interpersonal and communicative skills
- Excellent customer service and organizational abilities
- Superior trouble-shooting capabilities

What do we offer?

- Attractive work environment and a professional yet collegiate work atmosphere
- Possibility to attend training and workshops, to obtain certificates and learn from the knowledge and experience of colleagues
- A high degree of independence in the completion of assigned projects

Our terms of employment are determined based on our remuneration structure and depend on the degree to which the profile and job requirement are met.

CORE N.V. is a major and steadily growing ANSI/TIA 942-B rated 3 certified Datacenter providing a wide variety of services to its customers. Our organization offers services such as Private Cloud Services and Co location, Business Continuity Management, Mobility Everywhere, Network & Server Management, Consultancy and Training.
