

'We are looking for a team player to take their career, our bank and our clients into new victories'

Our IT department is looking for a:

Software Engineer

General

The Software Engineer delivers solutions to internal customers of the bank. This includes the modification, development and implementation of software programming applications/solutions that are related to the enterprise applications of the bank. He/she actively participates during the implementation of projects by developing new solutions and making sure that these are deployed according to the latest IT standards and change management practices.

Position Highlights

- Designs, reviews, analyzes, constructs, and modifies business application systems;
- Designs, develops and enhance small and large scope business applications;
- Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions;
- Works with different internal and external stakeholders in project delivery and for solving technical issues;
- Ensures that deliverables meet functional, technical and performance requirements;
- Work with other teams/ departments to resolve issues during entire software development and support lifecycle;
- Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code;
- Participates actively in the functional testing process;
- Support internal and external clients during User Acceptance Testing (UAT);
- Communicates recurring issues to supervisor/IT management;
- Troubleshoots and resolves production issues.

Requirements

- Bachelor Degree in the field of computer science or equivalent;
- Minimum 3 year experience with Application and System design, Development and Testing of software applications;
- Previous experience with banking application system(s) is a plus;
- Understanding of software development life cycle methodologies is a must, hands-on experience with Waterfall and Agile/Scrum process environments is a plus;
- Ability to quickly learn and understand the functionality of the application or enhancement to be deployed;
- Knowledge of trends and best practices in IT, interest in researching industry trends in IT;
- Eager to learn;
- Exceptional customer service skills and problem solving abilities;
- Good communication and interpersonal skills with a strong attention for details.
