RAC is looking for a Telecom & IT Technician to support regulatory oversight and ensure compliance within telecommunications, IT infrastructure, and satellite technology. If you have experience in networking, telecom regulations, and IT programming, this role provides a unique opportunity to impact national telecom governance.

KEY RESPONSIBILITIES

- Conduct regulatory assessments of telecom networks, IT infrastructure, and satellite systems.
- Monitor telecom providers for compliance with national and international regulations.
- Support spectrum management, frequency monitoring, and cybersecurity protocols.
- Assist in policy development, network security, and regulatory audits.

WHAT WE ARE LOOKING FOR

- Bachelor's degree in Telecommunications, IT, or related field.
- 3-5 years of experience in telecom networks, IT security, or satellite communications.
- Knowledge of telecom regulations, programming, and frequency spectrum management.
- Strong analytical, troubleshooting, and communication skills.
